Profile

Product Specialist with a strong foundation in gameplay systems, data-driven iteration, and player experience. Passionate about mobile casual games and skilled at bridging creative thinking with analytical methods from simulating economic systems to running structured playtests. Eager to contribute across the full game development cycle and grow within a collaborative, fast-paced product team.

Professional Experience

Game Designer

12/2024 – 02/2025

Bright Void Interactive

Contracted

- Designed and iterated on gameplay systems and level layouts, ensuring cohesive player experience across multiplayer scenarios.
- Collaborated with engineers to define and implement game logic, translating design intent into functional Unreal Engine 5 Blueprint systems.
- Contributed to multiplayer replication design, balancing gameplay feel with technical constraints in a fast- turnaround contract environment.

Virtual Production XR Specialist

06/2024 – 09/2024

EMN XR

- Designed and iterated on virtual sets using Unreal Engine 5, continuously refining visual output based on real-time feedback.
- Optimized complex real-time scene performance, applying structured problem-solving to balance quality and efficiency.

Game Designer

12/2022 – 05/2024

Tigloos

- Analyzed and simulated in-game economic systems using Python and Machinations; translated data findings into actionable design decisions.
- Authored and maintained Game Design Documents (GDD) defining core loops, progression systems, and feature specifications.
- Developed gameplay prototypes in Unreal Engine and led structured playtests, gathering user behavior data to iterate on game feel and balance.

Unreal Developer Intern

10/2022 – 12/2022

2Medya

- Implemented in-game logic using Unreal Engine Blueprint, contributing to feature completeness under tight delivery schedules.
- Supported QA and debugging processes, maintaining task tracking and ensuring deliverables stayed on schedule.

Projects

Pawn Up

2026

Startgate Game Jam

- Designed core gameplay mechanics and progression structure for a jam game delivered under strict time constraints.

Tech Hustle	2025
<i>Bright Void Interactive</i>	
Implemented replicated multiplayer interactions using Unreal Engine 5 Blueprints in a contracted production environment.	
Netflix - She Said Maybe	2024
<i>EMN XR</i>	
Provided technical support for image delivery and on-set visual coordination.	
Fixer: Car Mechanic's Journey	2024
<i>Tigloos Games</i>	
- Led core mechanic and progression system design with a focus on player satisfaction, engagement loops, and difficulty balance. - Analyzed player behavior patterns during QA to refine pacing and reduce drop-off points	
New Murabba	
Built cinematic scenes and virtual mapping environments in Unreal Engine for a large-scale architectural visualization project.	
Ece Seçkin - Atlantis	2024
Ensured real-time image delivery from set cameras to production monitors during performance-based shoots.	
Lost In Puppetland	2023
Designed the level layout and user interactions in a short time-limited game jam setting.	

Education

Radio Television and Cinema	09/2023 – 06/2026
<i>Istinye University</i>	3.30 GPA
Piscine Student	11/2023 – 12/2023
<i>42 Istanbul</i>	
Trainee	11/2022 – 07/2023
<i>Google Oyun ve Uygulama Akademisi</i>	
Economics	09/2022 – 05/2023
<i>Istinye University</i>	

Certificates

- Python Basics - Introduction to UI Design	- Foundations: Data, Data, Everywhere - Introduction to Game Design
